

# AUTOMATIC PLUG-IN AND PULL TEST MACHINE

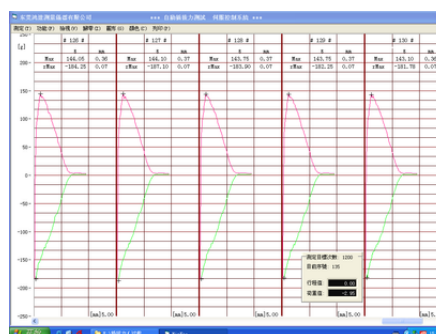

## Product Introduction:

- This machine is suitable for testing the insertion and withdrawal forces of various connectors, equipped with a patented automatic centering device, it can obtain completely accurate insertion and withdrawal force tests.
- Utilizing WINDOWS, Windows Chinese interface settings, the operation is simple and convenient, and all data can be stored (test conditions, displacement curve charts, life curve charts, inspection reports, etc.).

MODEL	PPIP-20AL	PPIP-50AL	PPIP-100AL
Max Load	20kgf	50kgf	100kgf
Displacement resolution	0.01mm		
Workpiece max high	150mm		
Determination speed range	0.01-300mm/s		
X. Y axis movement range	0-70mm		
Transmission mechanism	ball screws		
Beam spacing	280mm		
Dimensions	430*280* 1100mm		
Weight	100kg		
Power supply	AC220V, 50/60Hz		

Test interface

Execution interface
